

Daniel LaZenberry

Full Stack Web Developer

A detailed oriented Full Stack Web Developer, graduate of the Columbia Engineering Coding Boot Camp through Columbia University. Has a copious amount of curiosity for coding and an appetite for learning. Can remain stoic during extensive periods of stress and always sees the positives in any situation first. Passionate and teamwork driven. A military college background has granted the ability to take initiative and maintain integrity.

Projects

Health Hero (Group Project)

Github: <https://github.com/lrespino/Project-1>

Site Deployment: <https://lrespino.github.io/Project-1/>

- A meal planning app using drag and drop functionality.
- Did front-end work on the meal planning page. Pull request/code reviewer and head of user experience. Created site logo and added animations to the front-end. Created a modal for the ingredients list.
- Tools: HTML5, CSS3, JavaScript, Bootstrap, Animate.css, Firebase and Dragula.

Kwikly (Group Project)

Github: <https://github.com/kayleighs/Kwikly>

Link to Deployed Project: <https://kwiklyy.herokuapp.com>

- Kwikly helps people with minimal work skills and experience to find a job right away. The site gives employers the power to hire workers quickly. Need a quick buck? Go to Kwikly.
- Front-end development. Used css grid to section the front-end. Created the site layout.
- MERN stack (MongoDB, Express.js, React.js, Node.js) and Insomnia (For route testing).

Command Line Node App (Independent Project)

Github: https://github.com/DanLaZ/bamazon_CLIapp

- This app simulates an online store using MySQL for the database and the npm Inquirer to ask questions within the app.
- Tools: JavaScript, Node.js and MySQL Workbench.
